Business/Industrial/Commercial – details: _____

Other, specify _____

- Connection Information**
- Applications must be made in writing by the owner and signed by applicant.
 - The application fee must be paid before VAID work will begin. The fee is:
 - \$1,500 for a single residential connection
 - Cost to be determined by the Board of Trustees, for any other type of connection
 - Any extra costs over the application fee will be invoiced when work is complete.
 - A Development Capital Expenditure Charge may apply in addition to the Connection fee.
 - See the attached information sheet
 - Once the application is approved by the Board and all fees received, the service connection will be installed from the pipeline to the property line, when such property line coincides with established road allowance in which a District pipeline is located.
 - In situations where the property line does not adjoin the road allowance, or there are obstacles to locating the service connection at the property line, the service connection box will be located on the road allowance as close to the property as possible. The property owner will be responsible the installation of service pipe from the service connection box to the premises, including securing any necessary easements.
 - Service pipe on your property must be municipal grade tubing of HDPE rated 160 psi with compression fittings rated 200 psi.
 - The service pipe from the property line to the premises will be installed by the property owner. This must be inspected and approved by VAID before water supply commences.

Application for New Water Connection

- Connection**
- Connection size: _____ (Typical single residential is ¾")
- Details**
- Include a map of your property, with approximate location of structure(s), septic field, requested point of service, and any other information that will aid our Water Operators with completing your water service connection.
 - Mark or stake the ground to identify preferred water connection location or area. Note that there may be existing conditions that cause the final location to differ.
